## CUSTOMER BACKGROUND

Americhem is a leading manufacturer of groundbreaking color concentrates, additive and compounding technologies that serve multiple industries, with presence in various North American locations, United Kingdom, and China.

## KEY TECHNOLOGIES

- Oracle EBS R12
- Oracle Data Guard and Recovery Manager
- Oracle Cloud Infrastructure

## BUSINESS CHALLENGE

Due to various reasons, customer needed to move the following components of their on-premise IT landscape to a robust cloud solution –

- Oracle EBS Disaster Recovery (DR) environment
- 3 Oracle EBS non-production instances
- Oracle EBS Production database backup
- Non-Oracle backups from several plants

## SOLUTION & APPROACH

As part of the solution, Vigilant proposed the use of Oracle Cloud Infrastructure (OCI) as the end state.

The following services were leveraged –

- ➔ **Oracle Database Cloud Service**, for customer's EBS DR database
- ➔ **OCI Compute Classic**, for customer's EBS DR application and non-production instances
- ➔ **Oracle Database Backup Service**, for customer's EBS production database RMAN backups
- ➔ **Oracle Storage Cloud Service**, for customer's non-Oracle offsite backups, replacing CommVault
- ➔ **Corente VPN**, for connecting multiple customer sites to Oracle Cloud

## BENEFITS

- ➔ We moved all workloads in under 3 months because of the flexible and scalable nature of cloud computing
- ➔ Customer was able to effectively sustain a robust DR environment without investing in CapEx
- ➔ Quick provisioning and easy maintenance of cloud infrastructure resulted in increased operational efficiencies and reduced costs
