**Fusion ERP** Financials, Procurement, Capital Management, Risk Management

**SCM** – Manufacturing, Product Management, Order Management

**EPM** – Enterprise

## Digital Assistant

WebCenter Forms Recognition Cloud  
Integration Cloud Service for SaaS (OIC)

## Objective

To modernize and integrate their business systems and forge collaboration across departments.

## Challenges

- Multiple outdated and disparate solutions resulting in manual processes, data redundancies, inconsistencies.
- Inaccurate reporting data and optics across the enterprise.
- Client required to modernize and integrate their business systems
- Lack of collaboration across departments and operational effectiveness

## Solution

Vigilant used their proprietary InSculpt Methodology that was developed exclusively for Oracle Cloud Applications

## Results

- Integration of 15+ third-party solutions with Oracle Cloud applications via Oracle Integration Cloud
- Leveraged out-of-the-box capabilities resulting in lower cost and efficient implementation.
- Accurate forecasting, real-time data, collaboration between departments and reduced business silos with all organizations using a centralized data platform.
- Earned client recommendations for UX and Managed Services
