

Auria is a leading global supplier of automotive acoustics & fiber-based systems. They are experts in automotive flooring, acoustics, thermal management, decorative trim, & other fiber-based products. Their goal is to create serene driving environments for drivers & passengers alike.

PROBLEM

- Auria was a newco that split from parent company IAC Group
- They had to choose between hosting their Oracle workloads on S24 or OCI

SOLUTION

- Vigilant proposed to migrate & manage them on OCI
 - Was able to accomplish this at a fraction of the cost compared to S24

CASE STUDY

SERVICE PROVIDED

Lift & Shift On-prem Workloads to DBCS & Compute (OCI)

1. Create & Configure Virtual Cloud Network on Oracle Cloud Infrastructure (OCI)
2. Create & Configure Storage on OCI
3. Create & Configure Virtual Machines on OCI
4. Oracle DB Migration to DBCS
5. Oracle App Migration to Compute Cloud
6. Run & Maintain

RESULT

- Migrated 40+ apps & databases to OCI from their parent company's co-location
- First implementation of Kronos on OCI
- Client saved subsequent OpEx costs by moving to OCI
