

CASE STUDY

Modernized Business Operations with Oracle Applications

Oracle Cloud Financials | Procurement Cloud | SCM Cloud | EPM Cloud

Founded in 2008, Profound Medical is a Canadian medical device company focused on the development & marketing of customizable, incision-free therapeutic systems for the image-guided ablation of diseased tissue utilizing its platform technologies and leveraging the healthcare system's existing imaging infrastructure.

Revenue: \$80 Million

Deployment Location:
US, Canada & Germany

Industry: Medical Devices / Manufacturing

Legacy Platform: Oracle E-Business Suite

Products: Oracle Financials Cloud, Oracle SCM Cloud, Oracle, Order Processing Cloud, Oracle Planning Central Cloud, Oracle Procurement Cloud, Oracle Enterprise Performance Management Cloud

Methodology used

Vigilant used their proprietary **Insculpt Methodology** that was developed exclusively for Oracle Cloud Applications using Industry Practices and Oracle Cloud Applications standard functionality.

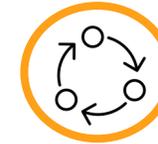

Customer Objectives and Challenges

- Implement an integrated and modern system for the growing organization
- System must be suitable for a small organization (start-up) while grow with the organization
- System must provide on-line reporting and analytical capabilities to the executive, operations and financial teams

Results

Executives have full view of the global organization

An end-to-end integrated solution

Improved Inventory control

Benefits Achieved

- ✓ Centralized monitoring of inventory operations with accurate granular inventory control
- ✓ Real time visibility to on hand availability, on hold, and other inventory statuses
- ✓ Ability to use the system with minimal internal resources
- ✓ Profound's SCM Implementation story was showcased at Oracle Open World and OUAG Collaborate
