Canada

Industry: Life Sciences

Legacy Platform: Oracle E-
Business Suite

Products: Oracle Cloud
Financials | Projects |
Procurement Cloud | Supplier
Portal Sourcing | Contracting |
SCM Cloud | HCM Cloud | SaaS
WebCenter

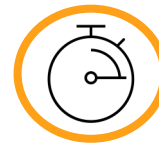

Methodology used

Vigilant used their proprietary **Insculpt Methodology** that was developed exclusively for Oracle Cloud Applications using Industry Practices and Oracle Cloud Applications standard functionality.

Customer Objectives and Challenges

- Client was seeking a modernized, fully integrated suite of applications to accommodate their Financials, Procurement, Supply Chain and HR needs
- Multiple non-Oracle applications (e.g., Ceridian/Dayforce, Kronos) which needed integration with HCM and Financials.

Results

Project Delivered on-
time

Reduced manual effort
by modernizing business
operations

Agility efficiency and
resilience improved

Benefits Achieved

- ✓ Business Transformation and implementation of Oracle Cloud Financials, Procurement, Supply Chain Management and Human Capital Management
- ✓ Over 12 interfacing applications, including integration with Ceridian Payroll and Kronos Timekeeping to HCM
- ✓ Over 20 data conversion objects
- ✓ Implemented regulatory controls and automation at several levels to meet the specific needs of LifeLabs
- ✓ Continuing support with Vigilant's Application Managed Services (AMS)
