Self-Service ERP & Procurement

SCM – Manufacturing
EPM Enterprise

HCM Cloud, Performance/Goals, Workforce Planning, Help Desk, Recruiting, Workforce Health/Safety, Talent Management, Workforce Compensation, Payroll, Time and Labor, Learning

Digital Assistant

WebCenter Forms Recognition

Objective

Reimagine a legacy system by integrating end-to-end software to achieve accurate forecasting, real-time data, collaboration between departments and reduced business silos with all organizations using a centralized data platform.

Challenges

- WCAA had used a 21+ year old Tyler Munis ERP for Financials, Reporting, Procurement, Human Resources, Payroll and Time/Labor.
- Legacy solutions hosted on aging infrastructure
- Loose integration between ERP and eleven (11) other applications.
- Lack of accurate reporting and forecasting across multiple levels within the Enterprise

Solution

Vigilant mobilized its proprietary InSculpt Methodology that was developed exclusively for Oracle Cloud Applications.

Designed PaaS solution to integrate with Fusion, for client to realize statistical metrics previously unknown.

Results

- Vigilant integrated 10+ third-party applications into Oracle Fusion Cloud via API integration.
- Organizational Change Management achieved for client team to embrace the overall solution by aligning new processes to Oracle Cloud recommended practices.
- Advanced capabilities for future integrations
- Enhanced reporting capabilities
