CASE STUDY
Robotics as a Service (RaaS)

Azure Cloud | Power Automate | Azure SQL Database Cloud | Power BI

Arts & Letters Creative Co.™

Arts and Letters Creative Co. is an independent creative company working in advertising and technology. Arts and Letters Creative Co. is designed specifically to work alongside the evolving infrastructure of modern clients, who are obsessed with ideas and bringing them to life. Arts and Letters Creative Co. clients represent some of the leaders in their industries, from tech to media, and in between.

Arts and Letters Creative Co. was looking to enhance their financial reporting operations, due to a legacy financial general ledger application hosted on a Citrix Virtual Machine, which limited reporting capabilities that required significant manual effort.

Vigilant architected a Robotics-as-a-Service (RaaS) solution for a hosted finance data warehouse that produces daily refreshed data with updated reporting and analytics dashboards. The RaaS reporting solution provides a secure, scalable, and impactful result, that was considered "life changing".

Challenges Resolved

Enhanced Reporting and Analytics Refreshed Daily

Reduced Time to Report Monthly Financials

Cloud based solution for zero impact to IT operations

Services Provided

- ✓ Azure Cloud, Azure SQL, Power Automate Resell, Architecture, and Setup
- ✓ Security Compliance
- ✓ High Availability
- ✓ Scalability
- ✓ SQL Patching (IaaS)
- ✓ Database Maintenance
- ✓ Replication & Disaster Recovery

- ✓ Robotic Process Automation (RPA) Development and Support
- ✓ Data warehouse architecture, development, and support
- ✓ Power BI dashboard and reporting development and support
