Automation of Multiple Payables Processes

BARRICK

Barrick Gold Corporation is the largest gold mining company in the world with $14B in annual revenue, headquartered in Toronto, Ontario, Canada. The company has mining operations in Argentina, Australia, Canada, Chile, the Dominican Republic, Papua New Guinea, Peru, Saudi Arabia, Tanzania, the United States and Zambia.

Barrick has global EBS operations with multiple languages and localizations.

Barrick has a roadmap for various automation initiatives across all processes in Oracle E-Business.

Solutions

Vigilant conducted an automation workshop to help identify use cases for Robotic Process Automation, flowchart the current process, and propose a solution to automate the processes along with budget estimates, execution timeline, and return on investment (ROI) statement.

Vigilant provided services to automate the following E-Business Payables processes.

- Invoice Processing
- Payment Processing

Countries Implemented

North America, Peru, Argentina, Dominican Republic

ES — English and Spanish

> 300K — Invoices Per Year

90% — Invoice Processing Accuracy

Automation of Invoice Processing

WORTHINGTON
INDUSTRIES

Worthington Industries is a global, diversified, metals manufacturing company providing customers with wide ranging capabilities, products and services for a variety of markets including automotive, construction and agriculture.

Their products range is seen across industrial components, Propane Cylinders, Water Systems, Suspended Ceiling Grid Systems, High Pressure Composites, etc.

Worthington uses Oracle E-Business to maintain their business transactions. EBS hosted on OMCS.

Worthington had outsourced their Invoice processing for the following services.

- Receiving Invoices (Electronic and Paper Invoices)
- Processing these Invoices into Oracle EBS

Solutions

Vigilant proposed an end-to-end scalable solution to process the invoices into Oracle using ABBYY solution.

- ABBYY for receiving and recognition of the Invoices
- Oracle custom programs to process Invoices into Oracle

Benefits

70%	80%	80%	95%	92%
Cost Reduction	Reduction in Manual Tasks	Increased Productivity	Output Accuracy	Improved Compliance

- ✓ Handled English and Spanish Invoices
- ✓ Handled PO and non-PO Invoices
- ✓ Efficient PO Matching enabled
- ✓ Handled handwritten Invoices
- ✓ Efficient and faster Invoice processing time
- ✓ Faster Account Reconciliation
- ✓ Smooth Financial Closing and Reporting

# Automation of Stock Order Processing using RPA

Founded in 1996, Essential Ingredients is a distributor of personal care products, household / industrial cleaners and cosmetics.

Problem

Upon receiving a purchase order, Essential Ingredients customer service team would manually create a sales order within their SQL Server based ERP System called Chempax, which once complete would then kickoff the downstream distribution process. But the process of transferring the purchase order into their ERP system involved manual entry and was labor intensive, which created a bottleneck in their order fulfillment process and often suffered from data entry errors.

Solutions

Using Blue Prism as the base platform and ABBYY as the OCR tool, Vigilant created an intelligent automation system that automated their purchase order to distribution process.

Faster Order Processing Enabled

Reduction in Errors Within Customer Orders

Eliminated Manual Order Entries

Benefits

Automation of Stock Order Processing using RPA
1. Elimination of Manual Order Entry
    a. Faster Order Processing
    b. Significant Reduction in Order Errors
2. Reduced Labor Costs
